PROFESSIONAL SUMMARY

I am a hard working and organised Junior Software Developer, looking for my first role in Tech, after recently graduating from Code Institute's Diploma in Software Development (E-Commerce Application). During my studies with the Code Institute, my learning took place replicating modern SaaS environments via Slack, GitHub/GitPod/GitHub Pages, and Heroku and learnt multiple skills and languages required to create Full Stack E-Commerce websites. Please find my Project Portfolio below, and links to my GitHub Repositories and Online CV above.

Previously I worked two separate jobs, a Site/Logistics Administrative Assistant in Construction and Senior Dance Teacher with the Dancing Nikita Company. I decided to retrain as a Software Developer as I wanted a more challenging and rewarding job. I was first introduced to Software development when I worked as a Project Lead with Careys Civil Engineering and my fascination grew until I decided to take the leap and change careers.

EDUCATION

- Diploma in Software Development (E-Commerce Application) – Code Institute, July 2021 – July 2022
- BA Hons Performing Arts (Dance) – University of Chichester, September 2007 – May 2017

SKILLS: TECH

HTML/HTML5	Python	GitHub/Gitpod
CSS/CSS3	API Implementation	Stripe
Bootstrap & Tailwind Frameworks	Django Framework	AWS
JavaScript	Agile Methodology	Cloudinary

SKILLS: GENERAL

Time Management	Attentive to detail	Collaborative	Fast Learner	Committed
-----------------	---------------------	---------------	--------------	-----------

PROJECT PORTFOLIO

[Clay & Fire Jewellery](#)

I created this e-commerce website as the final project of my course portfolio with the Code Institute. It is a jewellery website and was created using HTML, CSS, JavaScript, Python, Django, Bootstrap, Stripe and AWS.

[Foody Family](#)

Foody Family is a recipe sharing website where members of the Foody Family community can share and manage their own recipes as well as like others. Created using HTML, CSS, JavaScript, Python, Django, Bootstrap and Cloudinary.

[Yoga Flow Class Record](#)

This project allows the user to input class information to keep their records in order for tax returns and to aid in business decisions e.g. expansion. Made to be executed in the CLI using Python.

[High Low Game](#)

Higher or Lower game developed using HTML, CSS and JavaScript. The player must guess if the next number is higher or lower than the previous, if correct the score increases, if not then the score is reset to 0.

[Edinburgh School of Kathak Dance](#)

My very first project in web development. This is a basic HTML and CSS website for a fictional dance school in Edinburgh.

[London Escapists – In Progress](#)

This is a travel blog I created to share my thoughts and memories of my travel experiences over the past summer. It's still a work in progress at the moment but I am using it to try and develop my UI and UX skills.

EXPERIENCE

Retraining | Code Institute | July 2021 – July 2022

- Software Development course focusing towards building Full Stack E-Commerce websites.
- 5 Portfolio Projects focusing on the learning content for each module – See projects above in Project Portfolio section

Logistics Coordinator (HS2) | Strabag | November 2020 – August 2021

- Delivery Management and attentive to detail – All deliveries to be booked in before the 14:00 deadline with correct details to reduce issues upon arrival.

- Collaborative – work with the team, site and suppliers ensuring all compliance requirements are fulfilled
- User Acceptance Testing (UAT) prior to system release

Project Lead (Careys Live) | Careys Civil Engineering | Jan 2020 – November 2020

- Identify and research areas which the Carey Live system can improve the efficiency of the company
- Lead process improvement workshops/meetings
- Work with key members within the business to ensure new ideas are attainable without disrupting other departments
- Present ideas to the team for review and approval, thereby achieving Role Specific Dashboards for the Carey Live System.
- Write detailed Technical Specifications and liaise with the software developers to ensure the system is built as per the specification
- User Acceptance Testing (UAT) prior to system release
- Work to deadlines and well under pressure

Project Support Coordinator (Careys Live and Site) | Careys Civil Engineering | April 2015 – January 2020

- Compile and distribute meeting agendas and meeting minutes
- Prepared thorough Carey Live System User Guides
- Timesheets and Allocation Sheets
- Good Receipting, invoice clearing and plant returns
- Environmental Reports

Dancer and Teacher | Dancing Nikita Company | September 2013 – July 2021

- Teaching Kathak Dance to students of all ages ensuring they are training safely
- Training up assistants to become new teachers
- Preparing students for graded ISTD exams
- Preparing students for performances
- Liaising with parents on student progress and answering general queries
- Rehearsing and performing at events with the company

INTERESTS

- Dance (multiple Genres from Indian Classical to Contemporary)
- Jewellery Making
- Code Art – Currently Completing a Udemy Course
- React – Currently completing a Udemy Course in React.js
- I also want to partake in Code Institute Hackathons now that I have completed their course
